a

Congenital phenotypes

HPO phenotype

GM2−ganglioside accumulation
Histiocytosis
Short telomere length
Spinocerebellar atrophy
Neonatal sepsis
Profound static encephalopathy
Reduced beta−hexosaminidase activity
Subependymal giant−cell astrocytoma
Abnormality of amino acid metabolism
Decreased activity of mitochondrial complex I
HbS hemoglobin
Decreased CSF biopterin level
Decreased mitochondrial number
Profound global developmental delay
Increased circulating very long−chain fatty acid concentration
Loss of Purkinje cells in the cerebellar vermis
Absence of bactericidal oxidative respiratory burst in phagocytes
Defective production of NFKB1−dependent cytokines
Progressive spastic paraparesis
Recurrent Aspergillus infections

profound
severe

Top targets

GM2−gangliosidosis, AB variant	alternatively activated macrophage
Immunodeficiency 27A, mycobacteriosis, AR	microglial cell
Dyskeratosis congenita, autosomal recessive, 3	T cell
Spinocerebellar ataxia 1	alternatively activated macrophage
3−Methylglutaconic aciduria with deafness, encephalopathy, and...	chondrocyte
Hypotonia, infantile, with psychomotor retardation and charact...	fibroblast
Sandhoff disease	extravillous trophoblast
Tuberous sclerosis−2	endocrine cell
Tyrosinemia type 2	epithelial cell
Mitochondrial complex I deficiency, nuclear type 12	inflammatory cell
Hereditary persistence of fetal hemoglobin−sickle cell disease...	erythroid lineage cell
Alacrimia−choreoathetosis−liver dysfunction syndrome	mature neutrophil
DNA2−related mitochondrial DNA deletion syndrome	enterocyte
Mental retardation, x−linked syndromic, Christianson type	GABAergic neuron
Mental retardation, enteropathy, deafness, peripheral neuropat...	gastric goblet cell
Spastic ataxia, Charlevoix−Saguenay type	neuron
Granulomatous Disease, Chronic, Autosomal Recessive, Cytochrom...	monocyte
Ectodermal dysplasia and immunodeficiency 2	stromal cell
Adrenomyeloneuropathy	stratified epithelial cell
Granulomatous Disease, Chronic, Autosomal Recessive, Cytochrom...	monocyte

Familial multinodular goiter	neuron
Mitochondrial DNA depletion syndrome 4A (Alpers type)	kidney loop of Henle epithelial cell
Visceral myopathy 1	smooth muscle cell
3−Hydroxyacyl−Coa dehydrogenase deficiency	inflammatory cell
Krabbe disease	alternatively activated macrophage
Platelet disorder, familial, with associated myeloid malignancy	mature neutrophil
Hypoprebetalipoproteinemia, acanthocytosis, retinitis pigmento...	primordial germ cell
Mitochondrial DNA depletion syndrome 4A (Alpers type)	kidney loop of Henle epithelial cell
Huntington disease	alternatively activated macrophage
Hyper−IgE syndrome 2, autosomal recessive, with recurrent infe...	myeloid cell
Ataxia−Pancytopenia syndrome	alternatively activated macrophage
Thrombocytopenia 5	hematopoietic stem cell
Hemolytic anemia due to gamma−glutamylcysteine synthetase defi...	erythroid progenitor cell
Creutzfeldt−Jakob disease	astrocyte
Leukoencephalopathy, progressive, with ovarian failure	visceromotor neuron
GM1−gangliosidosis, type II	extravillous trophoblast
Tylosis with esophageal cancer	alternatively activated macrophage
Generalized pseudohypoaldosteronism type 1	taste receptor cell
Argininemia	mature neutrophil
Crigler−Najjar syndrome, type I	enterocyte
Hereditary myopathy with early respiratory failure	cell of skeletal muscle
